The shares have not been registered or approved by any government or any securities or other regulatory agency in Argentina, the Bahamas, Bahrain, Bermuda, Brazil, Cayman Islands, Colombia, Curacao, Mexico, Panama, Uruguay, United States, and Venezuela. In Chile and Peru, certain shares are approved for qualified distribution only.

Emerging markets carry risks as well as rewards. Investing in foreign securities involves additional risks including exchange rate changes, political and economic upheaval, the relative lack of information, relatively low market liquidity, the potential lack of strict financial and accounting controls and standards, and the possibility of arbitrary action by foreign governments, including the takeover of property without adequate compensation. These risks are magnified in emerging markets, which have historically been subject to significant gains and/or losses, and as such, absolute returns may be subject to increased volatility. An investment in this [strategy/ fund] may not be appropriate for all investors.

Investing in high yield bonds carry risks as well as rewards. The risk profile of high yield securities may be higher than that of investment grade securities. High yield bonds, also known as "junk bonds" are subject to additional risks such as the increased risk of default. The markets for high yields may be more volatile and may suffer from liquidity problems. An investment in this [strategy/ fund] may not be appropriate for all investors.
